

## Affordable solutions to surge-related problems

Power surges can enter your home over phone lines, television antenna or cable lines, and electric lines, damaging appliances and sensitive electronics. Besides replacement costs, homeowners also suffer inconvenience and lost time when a surge causes damage. Adams Electric offers solutions to those problems that are simple, affordable and effective.

### METER HARDWIRE PROTECTORS

**\$113.75 (plus tax)**

**\$170.75 installed (plus tax)**

**Protect major appliances from electrical surges.**

Connected outside the home at the meter base or inside at the service panel,

these devices will protect your home's major appliances, such as refrigerators, washing machines, dishwashers, etc. They are not designed to prevent surges to microprocessor-based equipment such as computers.

These devices carry a 15-year manufacturer's warranty. If the unit is damaged by a surge, the manufacturer offers a free replacement within the warranty period. If any major appliance protected by the unit is damaged, the manufacturer offers a connected-equipment warranty for repair or replacement of the appliance.

To order an Adams Electric recommended Surge Protector or for more information about affordable power protection, call toll-free 888/232-6732.

### AC CUBES

**\$10 (plus tax)**

**Protect microwave ovens and garage-door openers.**

When coupled with an installed Meter Hardwire Protector, the ACCube can be used to protect devices such as microwave ovens or garage door openers.

### PLUGSTRIPS

These plug-in devices have eight electric outlets and six-foot cords that plug into grounded outlets to protect home electronics and computers. Each device carries a manufacturer's lifetime product warranty and a connected-equipment warranty.

**Phone/Fax/Modem, plus Cable and Satellite Dish Line Protection**

**\$56 (plus tax)**

This unit is designed to protect home satellite dish systems, entertainment systems and televisions. Includes protection

for a phone line, coaxial cable line and a DDS or satellite dish line.

### WELL PUMP PROTECTORS

**Protect well pumps, pool pumps and sump pumps.**

This device is a single-phase surge protection unit which provides the maximum line protection for residential well pumps against damaging surges. Weather resistant encapsulation allows the protector to be installed in high-moisture environments. Available in 15-amp, 20-amp, 30-amp and 50-amp sizes on a special order basis.

15 amp, ED 15-120/240 V-S	<b>\$260</b>
20 amp, ED 20-120/240 V-S	<b>\$281</b>
30 amp, ED 30-120/240 V-S	<b>\$302</b>
50 amp, ED 50-120/240 V-S	<b>\$546</b>

## Other power solutions

### UNINTERRUPTIBLE POWER SUPPLY

A UPS or uninterruptible power supply prevents computer data loss from power blinks or outages. The battery in the UPS typically provides about 10 minutes of power, so you can safely close your programs and shut down your computer. A UPS normally has a surge protection component. Some units offer protection for both plug-in electronics and a phone line. These units vary by size and cost, depending on the back-up load requirements of your computer system.

See your cooperative district office for details on pricing and sizing of units to meet your needs. The units may be shipped directly to your home or business. Call for pricing.

### COMMERCIAL/INDUSTRIAL USES

Adams Electric has access to a full range of single- and multi-phase surge protection devices for commercial/industrial applications. Units are designed for installation on main service panels or installed inside switch gear or motor control centers. Other units are manufactured to be mounted on branch panels and sensitive electronic equipment.

Whatever the commercial/industrial application, contact Adams Electric Cooperative for help and support when it comes to protecting your company's investments in valuable equipment.

### HOW WARRANTIES WORK

Quality surge protectors, like those offered by Adams Electric, come with warranty coverage against surge damage that can range up to \$6 million.

Most warranties require that the protector be properly grounded in a three-prong outlet and that the protector be damaged by a surge in order to cover any losses.

Damage may be covered by both your homeowner insurance and the protector manufacturer, so you will have to contact both if a loss occurs. Typically, the claim will be smaller than your homeowner's deductible, in which case the surge protector manufacturer's warranty will cover the entire cost.

**SURGE**  
Protection

**for your  
home and  
electronics**

Adams Electric has affordable solutions to power surges that can enter your home through electric, phone, cable or satellite dish lines.

The graphic is a vertical advertisement for surge protection. It features a black background with several yellow lightning bolts striking downwards. The word 'SURGE' is written in large, bold, black letters, with 'Protection' written below it in a smaller, white, sans-serif font. To the right of this text, the phrase 'for your home and electronics' is written in bold black letters. Below this, a paragraph of text describes the service. At the bottom right, there is a photograph of a surge protective device, which is a black rectangular box with a blue label and a power cord.
